

August 9, 2004

IBM is pleased to announce the first IBM Informix *Chat with the Lab*. This is the first in a series of interactive sessions where customers, business partners and IBM Informix development resources have an open and meaningful dialog on Informix development and integration topics.

Attached, please find the invitation to this month's *Chat with the Lab: Informix Integration with WebSphere and Tivoli*.

The entire IBM Informix team looks forward to your participation in this event. Please feel free to contact me if you have any questions.

Sincerely,

David Proksch

Please reserve 90
minutes on your
calendar for this call.

Chat with the Lab: Informix Integration with WebSphere and Tivoli

Join us for the first in a series of monthly calls for Business Partners and customers to dialog with the Informix development lab on topics of interest to the Informix community. Our first call will focus on the integration of Informix with WebSphere and Tivoli.

You'll learn how Informix applications can be easily enhanced for:

- Web enablement
- Portals
- MQSeries
- Web services development
- Database backup
- Database monitoring

Adding these capabilities to your application increases the business value for your customers. IBM Business Partners can increase the marketability of their applications as well as increase their opportunity to resell IBM products.

Our keynote speakers will include:

- Jerry Keese, Director of the Informix lab
- Sрни Bhagavan, IDS Architect

**Business Partners, Customers, and IBMers
must RSVP for this e-meeting via the Web:**
